

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

Read more about Early Journal Content at <http://about.jstor.org/participate-jstor/individuals/early-journal-content>.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

PREVALENCE OF DISEASE.

No health department, State or local, can effectively prevent or control disease without knowledge of when, where, and under what conditions cases are occurring.

UNITED STATES.

CURRENT STATE SUMMARIES.

Telegraphic Reports for Week Ended June 18, 1921.

These reports are preliminary and the figures are subject to change when later returns are received by the State health officers.

PLAGUE.¹
HUMAN CASES OF PLAGUE REPORTED.

Place.	Period covered.	Cases.	Deaths.	Remarks.
California:	1921.			
San Benito County	Feb. 7	1	1	
	June 11	1		

¹ A summary of the reports received of the occurrence of plague and the finding of plague-infected rodents in the United States during 1920 was published in Public Health Reports, Jan. 7, 1921, p. 15.

PLAGUE-INFECTED RODENTS.

Place.	Period covered.	Rodents found plague infected.
California:	1921.	
San Benito County	May 15 to June 4	8
Florida:		
Pensacola	Jan. 1 to Apr. 18	5
	Apr. 19 to June 18	0
Louisiana:		
New Orleans	Jan. 1 to May 26	38
	May 27 to June 18	0
Texas:		
Galveston	Jan. 1 to May 28	1
	May 29 to June 18	0

Ground squirrels, *Citellus beecheyi*.

TYPHUS FEVER.

Navajo Indian Reservation, Shiprock, N. Mex.—June 15, 1921.¹

According to information dated June 15, 1921, 12 new cases of typhus fever, with one death, had occurred on the Navajo Indian Reservation, near Shiprock, N. Mex., since May 21. One of these new cases occurred on the Crown Point Agency. No cases had been reported off the Reservation to June 15.

Officers of the United States Public Health Service are cooperating with the Office of Indian Affairs, Department of the Interior, in suppressing the outbreak.

CITY REPORTS FOR WEEK ENDED JUNE 4, 1921.

CEREBROSPINAL MENINGITIS.

The column headed "Median for previous years" gives the median number of cases reported during the corresponding weeks of the years 1915 to 1920, inclusive. In instances in which data for the full six years are incomplete, the median is that for the number of years for which information is available.

The column headed "Median for previous years" gives the median number of cases reported during the corresponding weeks of the years 1915 to 1920, inclusive. In instances in which data for the full six years are incomplete, the median is that for the number of years for which information is available.

City.	Median for pre- vious years.	Week ended June 4, 1921.		City.	Median for pre- vious years.	Week ended June 4, 1921.
